

As an Indiana resident I want those in opposition to the Indiana Telephone Privacy law to realize how much harm they are doing!

I am a homeowner and stay at home mother and my husband and I were bombarded at or before 8am and all through the day even till 10pm with solicitation calls. I can't tell you how many times they've woken up me, my daughter and my husband or interrupted our family prayer and meal times to bother us for buisness that we just do not want. Does my daughter, husband, and myself who has severe migrane attacks on a weakly basis, deserve to be harrassed like this? I think it's terrible that buisness can do that to people in the privacy of their own home and that's why it was such a relief for the Telephone privacy law to be made! It made life around the home quiet and enjoyable again. Shame on those who put buisness over family! I will not do buisness with those who support Telephone or any other soliciting at one's home! The FCC needs to petition for withdraw and stop weakening such a good and decent law!!!
